

Balloon Rocket Race

Supplies: Balloons, string, tape, straw

Time: 5-10 minutes

How to: First, you will need a piece of string that is about 7 feet long. Then, you will have to blow a balloon up a lot, but not enough to pop it. Next, you will tape the already blown-up balloon to the straw with the open end of the balloon facing yourself. Last, put the string through the straw and stand at one end with a friend holding the string at the other end, release the balloon and see if you can make it to the other side. If you have a group of 4 you can turn this activity into a race. First to the end, wins!
