

Marshmallow Catapults

Supplies: Popsicle sticks, plastic spoons, rubber bands, marshmallows

Time: 15-20 minutes

How to: First, you will need in total about 10 popsicle sticks. You are going to stack up about 7-8 popsicle sticks on top of each other then slide one in the middle of that stack going the opposite direction. Tie rubber bands on each side of the stack of sticks and then tie the bottom of the plastic spoon to the single stick in the middle of the stack. Lastly, bend the spoon back so that it is bending backwards over the stack of sticks and release to catapult your object!
